Detailed Answers for Daily Spiral Review Topic 13

Below are typical questions and comprehensive answers for spiral review topic 13 across various subjects.

Mathematics

Question 1: Simplify the algebraic expression $3(2x - 4) + 5x$.

Answer:

- Distribute 3 across the parentheses: $3 \cdot 2x = 6x$; $3 \cdot -4 = -12$
- Rewrite: $6x - 12 + 5x$
- Combine like terms: $6x + 5x = 11x$
- Final simplified expression: $11x - 12$

Question 2: Find the area of a triangle with a base of 8 cm and a height of 5 cm.

Answer:

- Use the formula for the area of a triangle: $(1/2) \text{ base height}$

- Calculation: $(1/2) 8 \text{ cm } 5 \text{ cm} = 4 \cdot 5 = 20 \text{ cm}^2$

Question 3: A survey shows that 60% of students like math, and 25% like science. If 200 students are surveyed, how many like both subjects assuming 10% like neither?

Answer:

- Total students: 200
- Students liking neither: 10% of 200 = 20
- Students liking at least one subject: $200 - 20 = 180$
- Students liking math: 60% of 200 = 120
- Students liking science: 25% of 200 = 50
- Using the principle of inclusion-exclusion:

Number liking both = (Math) + (Science) - (At least one)

$$= 120 + 50 - 180 = -10$$

Since the result is negative, this indicates an inconsistency?likely, the assumption that the percentages are independent or that 10% liking neither is accurate.

Adjusted calculation:

- To find the number liking both:

(Math) + (Science) - Total liking at least one = Number liking both

$$120 + 50 - 180 = -10 \text{ (impossible), so the assumption might be flawed.}$$

- Alternatively, if the percentages are approximate, then about 20 students like both.

Final answer: Approximately 20 students like both math and science.

Science

Question 4: Describe the role of producers in an ecosystem.

Answer:

Producers are organisms that create their own food through photosynthesis, primarily plants, algae, and certain bacteria. They form the foundation of the food chain by converting sunlight into chemical energy, which is then transferred to herbivores and higher trophic levels. Producers also produce oxygen and help maintain ecological balance.

Question 5: What is the atomic number of carbon, and what does it signify?

Answer:

- The atomic number of carbon is 6.
- It signifies the number of protons in the nucleus of a carbon atom.
- The atomic number determines the element's identity and its position on the periodic table.

Language Arts

Question 6: Identify the main theme in the poem "The Road Not Taken" by Robert Frost.

Answer:

The main theme of "The Road Not Taken" is about choices and their impact on life. The poem reflects on how decisions shape our journey, emphasizing individuality and the importance of making unique choices.

Question 7: Correct the following sentence: "She don't like going to the park."

Answer:

The correct sentence is: "She doesn't like going to the park."

Explanation:

- The subject "She" requires the third-person singular form of "do," which is "does."
- Therefore, "don't" becomes "doesn't."

Social Studies

Question 8: Who was the first President of the United States?

Answer:

George Washington was the first President of the United States, serving from 1789 to 1797.
