SMS and voice calls reigned supreme as primary means of communication. However, the emergence of internet-enabled phones and the nascent social media scene hinted at a future where integrated platforms would become essential.

The Birth of Tango 2006

Tango 2006 was developed by a collaborative effort among telecom companies and tech startups aiming to capitalize on the burgeoning interest in multimedia messaging and social connectivity.

Unlike later apps that primarily focused on social media, Tango 2006 aimed to integrate voice, video, and messaging into a seamless user experience, setting the stage for future unified communication platforms.

Core Features of Tango 2006

- Instant Messaging: Real-time chat feature with delivery and read receipts.
- Media Sharing: Easy sharing of multimedia files directly from the phone's gallery.
- Group Chats: Support for small groups, enabling collaborative conversations.

- Voice and Video Calls

- Contact Approval: Users could approve or deny connection requests.
- Encrypted Communication: Basic encryption protocols for messaging to prevent eavesdropping.
- User Blocking: Ability to block unwanted contacts.

Technical Architecture and Design

Protocols and Data Management

- Communication Protocols: Utilized SIP (Session Initiation Protocol) for call setup, and custom protocols for messaging.
- Data Storage: User data and media files were stored securely on cloud servers, with local caching for quick access.
