I am highly experienced with Windows OS, including Windows 10 and Windows Server editions. Additionally, I have working knowledge of various Linux distributions such as Ubuntu and CentOS. I am comfortable performing installations, configuring settings, troubleshooting issues, and managing updates across these platforms.

4. How do you handle a situation where a user reports a problem you cannot reproduce?

When I cannot reproduce an issue, I ask detailed questions to gather context?such as the exact steps leading to the problem, error messages, and recent changes. I check system logs and perform remote diagnostics if possible. I communicate transparently with the user, informing them that I am investigating and may need further information or to observe their environment directly. In one instance, a client's network was experiencing intermittent connectivity issues. After initial checks, I discovered a faulty switch port causing packet loss. I replaced the port and reconfigured the network topology. To prevent future issues, I documented the network setup and implemented monitoring tools to alert me in case of similar problems. The client appreciated my proactive approach and improved network stability.

9. How do you prioritize tasks when managing multiple support requests?

I assess each request based on urgency and impact?critical issues affecting multiple users or core functions take priority.
