These question stems prompt children to examine parts of a whole, identify relationships, or compare items.

Examples:

- "What do you notice about these two objects?"
- "Why do you think this happened?"
- "Can you find the differences between these two pictures?"
- "What is the same about these two stories?"

Evaluating Questions

Evaluating questions help children make judgments based on criteria or evidence.

Examples:

- "Which activity did you enjoy the most? Why?"
- "Do you think this story is happy or sad? Why?"
- "Which picture shows the best way to solve this problem?"
- "Is this the right way to do it? Why or why not?"

Creating Questions

Creating questions challenge children to generate new ideas, stories, or solutions.

Examples:

- "Can you make up a new ending for this story?"
- "How would you solve this problem using your own idea?"
- "Can you design a new game using these materials?"
