Functionalism

- Serves a social function by promoting social cohesion through shared outrage.
- Encourages social change by challenging outdated norms.
- Acts as a boundary-maintaining mechanism.

The workbook explains Durkheim's concept of anomie and how deviations from norms can signal social instability. It also discusses Merton's strain theory, which attributes crime to the disconnect between societal goals and the means available to achieve them.

Marxism

Marxist perspectives emphasize the role of capitalism in shaping crime patterns. Key points include:

- The concept of chivalry and double standards in policing and sentencing.

The workbook explores gendered experiences of victimization and offending, emphasizing the importance of gender as a social construct.

Interactionism

Interactionist theories examine how labels and social interactions influence criminal identity. Key concepts include:

- Deviant Careers: The process through which individuals become involved in deviant activities over time.

Activities within the workbook prompt students to analyze real-life labeling cases and consider the social construction of deviance.

Postmodern Perspectives

The workbook introduces concepts like supercomplexity and discusses how new forms of crime (e.g., cybercrime) challenge traditional policing and sociological explanations.

Analyzing Social Distribution of Crime

Understanding who commits crime and why is central to sociological analysis. The workbook explores various factors influencing crime rates across different social groups.

Gender and Crime

- Males are statistically more likely to commit violent and property crimes.
- Feminist perspectives argue that societal gender roles and patriarchy influence criminal behavior.
- The concept of chivalry suggests that women are treated more leniently by the justice system.

Activities include examining gendered crime statistics and debating whether gender differences are due to biology or socialization.

Ethnicity and Crime

- Data often shows higher police recorded crime rates among certain ethnic minorities.
- Sociologists analyze whether these disparities are due to structural inequalities, discrimination, or cultural factors.
- The concept of ethnic stereotyping and racial profiling are critical issues discussed.

The workbook encourages critical evaluation of official statistics and their limitations, emphasizing the importance of context and interpretation.

Social Class and Crime

- Lower social classes tend to experience higher involvement in certain types of crime.
- Marxist theories link this to economic deprivation and lack of opportunities.
- However, some crimes (e.g., corporate crime) are more prevalent among the middle and upper classes.

Students are guided to consider debates around crime as a response to poverty versus crime as a product of individual choice.

Media and Crime

The role of media in shaping perceptions of crime is a vital component of the workbook. It discusses:

- How sensationalist reporting can distort crime rates.
- The creation of moral panics and moral entrepreneurs.
- The impact of media coverage on policy-making and public attitudes.

Case studies of high-profile crimes illustrate how media narratives influence societal responses and policy debates.

- The victim-offender overlap: many individuals are both victims and offenders.
- Types of victims (e.g., vulnerable groups).
- The importance of understanding victimization patterns to inform policies.

Activities include analyzing victim surveys and discussing the implications for social justice and crime prevention.

Control, Punishment, and the Criminal Justice System

The final section examines how society controls deviance through formal and informal mechanisms:

- Formal Control: policing, courts, sanctions.
