Using case studies or data, students identify the point where population growth stabilizes.

Sample Questions & Answers:

- Q: Define carrying capacity.

A: The maximum number of individuals an environment can sustain indefinitely.

- Q: What happens when a population exceeds its carrying capacity?

A: The population often declines due to resource depletion and increased mortality.

- Q: How can human activities influence the carrying capacity of an environment?

A: Activities like deforestation, pollution, and overfishing can reduce carrying capacity, leading to population declines.

3. Analyzing Population Interactions

Objective: Explore how different species interact within populations.

Activity Outline:

Students examine scenarios involving predation, competition, and symbiosis, analyzing their effects on population sizes.

Sample Questions & Answers:

- Q: Describe how predation can regulate prey populations.

A: Predators reduce prey numbers, preventing overpopulation and maintaining balance.
