Understanding these topics forms the foundation for analyzing the answers and applying them effectively.

Understanding the Accounting Cycle

The accounting cycle is a series of steps that companies follow to record, process, and report financial data.

Major Steps in the Accounting Cycle

- Analyzing transactions

- Journalizing transactions
- Posting to the ledger
- Preparing an unadjusted trial balance
- Making adjusting entries
- Preparing an adjusted trial balance
- Preparing financial statements
- Making closing entries
- Preparing a post-closing trial balance

The answers in Chapter 6 help clarify each step's purpose and the correct procedures for completing them accurately.

Adjusting Entries: Purpose and Types

Adjusting entries are essential for aligning revenues and expenses to the correct accounting period, ensuring compliance with the matching principle.

Purpose of Adjusting Entries

- To record revenues earned but not yet received
- To record expenses incurred but not yet paid
- To update asset and liability account balances

Types of Adjusting Entries

- **Accrued Revenues:** Revenues earned but not yet received or recorded
- **Accrued Expenses:** Expenses incurred but not yet paid or recorded
- **Deferred Revenues:** Cash received before revenue is earned
- **Prepaid Expenses:** Payments made in advance for expenses

Chapter 6 answers provide step-by-step guidance on how to prepare each type of adjusting entry correctly.

Sample Questions and Detailed Answers from Chapter 6

Below are typical questions from Chapter 6 along with comprehensive answers that reflect the solutions provided in the textbook.

Question 1: Why are adjusting entries necessary at the end of an accounting

period?

Answer: Adjusting entries are necessary to ensure that all revenues and expenses are recorded in the period in which they are earned or incurred. This aligns with the matching principle of accounting, which states that expenses should be recognized in the same period as the revenues they help generate. Without adjusting entries, financial statements may present an inaccurate picture of a company's financial position and performance.

Question 2: Prepare an adjusting entry for accrued wages of \$2,000 that are earned by employees but not yet paid as of the end of the accounting period.

Answer: The adjusting entry would be:

Debit: Wages Expense \$2,000

Credit: Wages Payable \$2,000

This entry recognizes the wages expense incurred during the period and records a liability for wages owed but not yet paid.

Question 3: A company received \$12,000 in advance for services to be performed over three months. At the end of the month, \$4,000 worth of services have been performed. How should the adjusting entry be recorded?

Answer: Since the company has earned \$4,000 of the revenue, the adjusting entry would be:

Debit: Unearned Revenue \$4,000

Credit: Service Revenue \$4,000

This recognizes the revenue earned during the period and reduces the liability account accordingly.

Question 4: How do prepaid expenses differ from accrued expenses, and how are they recorded?

Answer: Prepaid expenses are payments made in advance for goods or services to be received in the future (e.g., prepaid insurance). They are initially recorded as assets and expensed over time as the benefit is realized. Adjusting entries decrease the asset account and increase the expense account.

Accrued expenses, on the other hand, are expenses incurred but not yet paid or recorded (e.g.,

accrued wages). They are recognized with an adjusting entry that increases expenses and liabilities without prior cash outflow.

Preparing Financial Statements After Adjustments

Once adjusting entries are made, financial statements such as the income statement and balance sheet are prepared.

Key Steps

- Update account balances with adjusting entries
- Prepare an adjusted trial balance to ensure debits equal credits
- Use the adjusted trial balance to prepare financial statements

Answers from Chapter 6 guide students through this process, emphasizing accuracy and completeness.

Closing Entries and Post-Closing Trial Balance

After financial statements are prepared, the temporary accounts (revenues, expenses, dividends) are closed to Retained Earnings, preparing the books for the next accounting period.

Steps for Closing Entries

- Close revenue accounts to Income Summary
- Close expense accounts to Income Summary
- Close Income Summary to Retained Earnings
- Close Dividends to Retained Earnings

The answers in Chapter 6 detail the journal entries involved and explain the purpose of each step.

Post-Closing Trial Balance

- Contains only permanent accounts (assets, liabilities, and equity)
- Ensures debits equal credits after closing entries
