Algebra and Number Operations

In questions focusing on algebraic manipulation, the mark scheme emphasizes:

- Correct application of algebraic rules.
- Accurate expansion and factorization.
- Simplification steps.
- Correct substitution into formulas.

For example, in a question requiring expanding brackets, the scheme awards marks incrementally for each correct term, with additional marks for correct simplification. Partial marks are often awarded for correctly identifying parts of the expression, even if subsequent steps contain errors.

Geometry and Shape Problems

For geometry questions, the mark scheme prioritizes:

- Correct application of geometric theorems (e.g., Pythagoras, angle rules).
- Accurate calculation of lengths, angles, or areas.
- Proper use of diagrams and labels.

- Appropriate use of formulas.
- Clear presentation of data (tables, graphs).

The scheme recognizes that students may approach data differently, and it awards marks based on the correctness of the method and understanding.

Marking Strategies and Common Features

Method vs. Final Answer

The mark scheme often distinguishes between marks awarded for method and those for the final answer:

- Method Marks: Awarded for correct procedures, calculations, and reasoning steps.
- Accuracy Marks: Awarded for correct final answers, provided the method was correct.

This approach encourages students to demonstrate understanding rather than solely focusing on the answer.

Partial Credit Allocation

The scheme typically allows for partial credit in multi-step problems. Key features include:

- Awarding marks progressively as each step is correctly completed.
- Recognizing partial understanding even if the final answer is incorrect.
- Providing clear guidance to examiners on when to award partial marks.

Acceptable Alternatives

In many cases, the mark scheme lists acceptable methods or answer formats, allowing for alternative correct solutions. For example:

- Using different algebraic techniques.
- Applying different geometric reasoning methods.
- Presenting data in various valid formats.
