The "bing" in the phrase "math kangaroo 2008 bing" may refer to a particular resource, website, or search term used by participants seeking past papers, solutions, or discussion forums related to the 2008 contest.

Structure and Format of Math Kangaroo 2008

Contest Format and Rules

The 2008 Math Kangaroo followed the standard format but may have included some regional variations. Generally:

- The test duration was about 75 minutes.
- Each participant answered 24 multiple-choice questions.
- The questions increased in difficulty, with early problems being easier and later ones more challenging.
- Participants received 3 points for each correct answer, 0 for unanswered, and typically no penalty for wrong answers.

Levels and Target Age Groups

In 2008, the main focus was on the levels corresponding to different age groups:

- Level 3 and 4 were most popular among middle school students.
- Levels 1 and 2 targeted primary school students.
- Levels 5 and above catered to high school students.

This stratification helped ensure that students faced questions appropriate for their cognitive development.

Sample Problems from Math Kangaroo 2008 Bing

To give an idea of the contest's difficulty and style, here are some representative problems from the 2008 edition:

Sample Problem 1: (Level 3)

If a number is divisible by 3 and by 4, then it is divisible by:

- A) 6
- B) 12
- C) 24
- D) 36

Solution: Since the number is divisible by both 3 and 4, it must be divisible by their least common multiple, which is 12. Therefore, the correct answer is B) 12.

Sample Problem 2: (Level 4)

A sequence of numbers starts with 2, and each subsequent term is obtained by multiplying the previous term by 2. What is the 5th term in the sequence?

Solution: The sequence is 2, 4, 8, 16, 32. The 5th term is 32.

Sample Problem 3: (Level 5)

In a class of 30 students, each student shakes hands with every other student exactly once. How many handshakes occur in total?

Solution: The total number of handshakes is the combination of 30 students taken 2 at a time: $C(30, 2) = (30 \times 29) / 2 = 435$.

These problems exemplify the range of difficulty and the emphasis on logical reasoning typical of the contest.

- Moderate Questions: Require combining multiple concepts or applying logical deductions.
- Challenging Questions: Involve complex reasoning, multi-step solutions, or unorthodox approaches, encouraging higher-order thinking.

Analyzing Sample Questions from 2013 Level 5

Sample Question 1: Pattern Recognition

In a sequence, the first term is 2, and each subsequent term is obtained by adding 3 to the previous term. What is the 10th term?

This question assesses understanding of arithmetic sequences, a fundamental concept in early algebra. It requires recognizing the pattern and applying the formula for the n th term: $a_n = a_1 + (n-1)d$.

Analysis:

The sequence is 2, 5, 8, 11, ...

Applying the formula: $a_{10} = 2 + (10-1) \times 3 = 2 + 27 = 29$.

The question is straightforward but reinforces the understanding of sequences.

Sample Question 2: Geometry and Spatial Reasoning

A square has a side length of 4 cm. What is the area of the square?

Analysis:

A basic geometry question that tests knowledge of area calculation: $\text{Area} = \text{side}^2$.

Solution: $4 \text{ cm} \times 4 \text{ cm} = 16 \text{ cm}^2$.

While simple, such questions serve as foundational skills.

Sample Question 3: Word Problem

A basket contains red, blue, and green apples. There are twice as many red apples as green apples, and the total number of apples is 18. If there are 4 blue apples, how many red apples are there??

Analysis:

This problem involves setting up algebraic equations.

Let (g) = number of green apples, then red apples = $(2g)$.

Total apples: $(2g + g + 4 = 18)$.

Simplify: $(3g + 4 = 18 \rightarrow 3g = 14 \rightarrow g = \frac{14}{3})$, which is not an integer, indicating a potential trick or an approximation in the problem.

In actual contest settings, questions are designed so that solutions are integral, emphasizing careful problem reading.
