The History of Flight

Early Human Attempts to Fly

Humans have long been captivated by the concept of flight. Ancient civilizations documented their fascination with the skies through mythologies and early engineering attempts. Notable early efforts include:

- Mythological references: Icarus and Daedalus in Greek mythology.
- Early gliders: Concepts by Leonardo da Vinci, who sketched flying machines centuries before powered flight was possible.
- Kites and balloons: Chinese inventors used kites for military and recreational purposes, while ballooning became prominent in the 18th century with pioneers like the Montgolfier brothers.

The Birth of Powered Flight

The late 19th and early 20th centuries marked a pivotal era:

- Otto Lilienthal: Known as the "Glider King," he made significant advancements in controlled gliding.
