- Marginal Analysis and Optimization

Dean championed the principle of marginalism—analyzing incremental changes—to guide decisions such as pricing, output levels, and investment. His teachings stress that managers should compare marginal benefits with marginal costs to achieve optimal outcomes.

- Price and Output Determination

In his writings, Dean provided frameworks for understanding how firms determine prices and output levels in different market structures. He explored monopoly, oligopoly, and perfect competition, emphasizing strategic considerations like product differentiation and entry barriers.

- The Role of Market Structure and Competition

Dean underscored the importance of understanding market dynamics. His analyses demonstrated how market structure influences managerial decisions, with a focus on strategic behavior, barriers to entry, and competitive forces.

Methodological Innovations and Pedagogical Approach
