- **Simulate Fire Conditions:** Use smoke pens, aerosol sprays, or test magnets to activate smoke detectors, heat sensors, or manual pull stations. For smoke detectors, gently introduce smoke or aerosol to trigger detection.
- **Observe Alarm Activation:** Confirm that the control panel registers the detection and that alarms are sounding and visible (strobes, LEDs).
- **Check Notification Appliances:** Verify that horns, bells, strobes, and other alert devices activate as intended.
- **Record Results:** Document which detectors and notification devices responded correctly and note any failures or anomalies.
- **Proceed to Next Zones:** Continue systematically through all detection zones, repeating the

process.

- **Complete the Test:** Once all areas have been tested, deactivate the walk test mode from the control panel.

Special Considerations

- Ensure that testing methods do not cause unnecessary panic or disruption.
- Use non-corrosive, approved testing aerosols or smoke devices.
- Avoid testing during peak occupancy times if possible.
- Maintain safety by informing occupants when testing is underway.

Post-Test Procedures

Analyzing and Documenting Results

After completing the walk test, review the recorded data to identify:
