The marking key is often accompanied by a standardisation document that provides instructions on applying the scoring criteria uniformly across different examiners and sessions.

Development and Validation of the Marking Key

Creating an effective marking key is a rigorous process involving multiple stages:

Item Development

Question writers craft items aligned with the WACE syllabus, ensuring they target core learning outcomes. These questions are designed to assess a spectrum of cognitive skills, from recall to analysis.

Initial Marking and Pilot Testing

A sample of student responses from pilot assessments is scored using provisional marking keys. This phase identifies ambiguities, inconsistencies, or overly harsh/lenient marking standards.

Expert Review and Consensus Building

Assessment specialists and subject teachers review initial markers' results, discussing discrepancies and refining the marking criteria to improve clarity and fairness.

Standardisation and Moderation

Before the final exam, markers undergo training sessions where they collaboratively score sample responses, ensuring a shared understanding of applying the marking key. This process minimizes variability and promotes reliability.

Post-Exam Validation

After the exam, statistical analyses such as item response theory (IRT) and classical test theory (CTT) are employed to confirm the marking key's effectiveness and fairness across diverse student

populations.

Application of the Marking Key in Exam Scoring

Examiners use the marking key meticulously to evaluate student responses. The process involves:

- Reading student answers thoroughly.
- Comparing responses against the model answer and marking criteria.
