Rural-urban migration occurs when people move from countryside areas to cities, often driven by the search for better employment opportunities, education, and healthcare. For example, in India, many rural residents migrate to cities like Mumbai and Delhi due to poverty and lack of services. The effects include rapid urban growth, increased pressure on infrastructure, and the development of informal settlements. Urban Growth and Challenges

Sample Answer:

Urbanization can significantly impact environmental sustainability by increasing pollution, reducing green spaces, and consuming large amounts of resources.
