- **Selections:** You can select objects within CATIA to manipulate or analyze.

### Common Operations in VBA

- **Creating and Modifying Geometry:** Automate the creation of points, lines, surfaces, and features.
- **Parameter Management:** Read or update parameters within parts or assemblies.
- **File Operations:** Save, close, or export documents via scripts.

- Iterating through Collections: Loop through features, bodies, or parameters.

## Example: Extracting Parameters from a Part

```
``vba

Sub GetParameterValue()

Dim partDoc As PartDocument

Dim part As Part

Dim parameters As Parameters

Dim param As Parameter

Set partDoc = CATIA.ActiveDocument
