Introduction to Diaphragm Structures

What Are Diaphragms?

Diaphragms are structural elements that serve as horizontal or nearly horizontal planes, primarily tasked with distributing lateral loads—such as those from wind, seismic activity, or other horizontal forces—across a building's structure. They act as rigid or semi-rigid planes that connect vertical elements, ensuring overall stability.

Types of Diaphragms

Diaphragms are broadly classified based on their geometry and material properties:

- **Flat Diaphragms:** Usually made of monolithic, flat concrete slabs or wood panels, characterized by minimal geometric complexity.
