For example, "think like a detective" or "think like an entrepreneur." This framing is rooted in cognitive psychology and design thinking, emphasizing empathy and perspective-taking as tools for innovation.

Historically, the idea draws from the notion that understanding the thought processes of others can lead to better communication, problem-solving, and decision-making. It is also central to methods such as "role-playing," "empathy mapping," and "mindset shifting," which are employed across education, business, and therapy.
